Professional Summary

Full-stack web engineer with 3+ years of experience shipping web and mobile applications end-to-end using **Angular**, **React**, **TypeScript**, and **.NET**, complemented by **Spring Boot** and **Node.js**. I take features from API design and data modeling to polished, responsive UIs, with a consistent focus on clean architecture, security (JWT auth, PBKDF2 hashing), and Docker-based delivery across e-commerce, document editing, and stock-management domains. Demonstrated engineering depth through 30+ public repositories, including fully architected full-stack applications with real authentication, persistence, and interactive clients.

Core Skills

- **Frontend:** Angular, React, TypeScript, JavaScript, HTML5, CSS3, SCSS, TailwindCSS, Three.js
- **Backend:** C# (.NET 8, ASP.NET Core Identity/JWT), Spring Boot, Node.js, NestJS, Symfony, Laravel
- **Data & DevOps:** PostgreSQL, MySQL, MongoDB, SQLite, Firebase, Docker, Git
- **Practices:** RESTful Web APIs, OpenAPI, Clean Architecture, Unit Testing (xUnit), Agile/Scrum, CI/CD
- **Design & AI Tools:** Adobe Photoshop, Adobe Illustrator, Inkscape, Figma, Google Gemini, ChatGPT, DeepSeek, LM Studio, opencode

Professional Experience

Mobile Developer (Freelance) — *Homeo*

Oct 2024 – Mar 2025

- Shipped a real-time GPS geolocation feature powered by **GeoApify** in the *Flutter/Dart* admin app, locating customers and professionals live on a map.
- Designed, implemented, and tested the full location flow, ensuring reliable geolocation handling within the existing admin experience.

Angular Developer — *Webify Technology*

Feb 2024 – May 2024

- Owned debugging and UI delivery for **Angular** client applications, resolving bugs and shipping improvements that raised application stability and code quality.
- Worked directly on production-facing features, applying clean component structure and re-usable state patterns across the client codebase.

Full-Stack Web Developer Intern — *CAMELSOFT LLC*

Mar 2022 – Jun 2022

- Delivered a 3D model sales platform end-to-end (**Angular**, **Spring Boot**, **Three.js**), from requirements analysis to a working application with interactive real-time 3D product manipulation.
- Designed the full-stack architecture for the internship project, covering the REST API, data layer, and a Three.js-powered product viewer.

Game Development Instructor — *GOMYCODE*

Aug 2021 – Jan 2024

- Designed and delivered structured software development curricula, mentoring students from concept to working builds.
- Built strong communication, code-review, and technical mentoring skills in a professional teaching environment.

Featured Projects

Dungeon World — Adventure Gamebook Platform

React 19, TypeScript, TailwindCSS, .NET 8, EF Core, PostgreSQL, Docker Compose, JWT

- Architected a full-stack monorepo (React + Vite client, .NET 8 Clean Architecture API, PostgreSQL) orchestrated with Docker Compose across three services.
- Engineered a PDF ingestion engine that auto-detects single- vs double-page layouts and parses adventure gamebooks into structured, playable JSON (sections, choices, illustrations, combat) behind a pluggable parser factory.
- Implemented secure accounts with PBKDF2 password hashing (100k iterations), validated JWT auth, saved adventures, achievements, and an inventory, plus a terminal-style reader with a command language (LOOK, GO, INVENTORY, SAVE, RESET, HELP).
- Turned a raw PDF into a complete, account-backed game experience end-to-end.

StockPro — Inventory Management System

Angular, TypeScript, SCSS, .NET 8, EF Core, PostgreSQL, ASP.NET Identity, Docker Compose

- Designed a ledger-based inventory model where every stock movement (in / out / adjust) updates current stock transactionally, with guards preventing negative stock.
- Built role-based admin features (user management with self-deletion and self-demotion guards), supplier and bill debt tracking, employee management, and profile uploads with type and size validation.
- Shipped a modular Angular frontend with standalone components, JWT interceptors, route guards, and a full dark-mode design system, containerized with Docker Compose and Nginx.

SiloSync — Wheat Silo Management System

Symfony 8.1, PHP 8.4, PostgreSQL 17, Doctrine ORM, Docker Compose, Nginx, Twig

- Built a full-stack wheat silo management platform (Symfony + PostgreSQL) with accounts and per-user workspaces.
- Implemented the inventory business logic server-side: capacity-validated receipts and discharges plus FIFO-based transfers between silos, with a full operations audit log.
- Shipped the entire UI in English, French, and Arabic with RTL layout and a per-user locale preference, fully containerized with Docker Compose (Nginx + PHP-FPM + Postgres).

Online Document Editor

React, TypeScript, TailwindCSS, Tiptap, .NET 8, Docker

- Built a full-stack document editor for creating and editing DOC and PDF documents in the browser, pairing a React/Tiptap rich-text frontend with a .NET 8 backend.

Personal Portfolio + API

React, TypeScript, C#, .NET 8, xUnit, FluentEmail

- Developed a React portfolio backed by a custom .NET 8 REST API with unit tests (xUnit), email integration (FluentEmail), and CORS configuration; deployed to GitHub Pages.

Other Projects

- **E-commerce 3D Store** — Online store with interactive 3D product presentation. *Angular, Spring Boot, Three.js.*
- **Duel Masters Backend** — REST API backend for a card game platform. *Java, Spring Boot, Docker.*
- **Online Training Site Backend** — Student training platform backend, documented and tested with Postman. *Node.js, JavaScript.*
- **Image-to-PDF Converter** — Desktop utility converting multiple images into a single PDF. *C#, WPF, .NET 7.*
- **Snapface** — Angular social-media demo application. *Angular, TypeScript.*
- **Angular Portfolio Website** — Early portfolio application built with Angular 18. *Angular 18, HTML5, CSS3.*

Education & Languages

B.S. Software Engineering — EPI (honors)

Sep 2020 – Sep 2023

Bachelor's in Computer Science — ISITCOM (honors)

Jan 2016 – Jan 2019

- **Languages:** Arabic (Native), English (Fluent), French (Fluent)
